Domino's Pizza Sales Analysis Report

DOMINOS PIZZA | YEAR-END ANALYTICS

Objective: Comprehensive Exploratory Data Analysis (EDA) of 21,350 unique pizza transactions to identify growth drivers, operational bottlenecks, and customer segments.

Generated for GitHub & Business Portfolio

SQL | Business Intelligence

01. COMPREHENSIVE ORDERS ANALYSIS

21,350

TOTAL VOLUME

3,538

PEAK DAY (FRI)

1,935

MAX MONTH (JULY)

Analysis indicates highly cyclical order patterns influenced heavily by weekends and seasonal peaks. **Friday** represents the highest transactional velocity with 3,538 units, which is **34% higher** than the Sunday low of 2,624.

The volume trend shows consistent resilience. Despite a slight dip in October (1,646), the business maintains an average of **1,779 orders per month**. The cumulative growth suggests a highly stabilized market presence.

02. REVENUE & FINANCIAL PERFORMANCE

\$817,860

GROSS REVENUE

\$38.31

AVERAGE ORDER VALUE

5.3%

TOP SKU SHARE (THAI CHK)

Lead Revenue Streams by Category

- **Revenue Concentration:** The top 3 Pizzas (Thai, BBQ, and Cali Chicken) contribute a combined **15.6%** of total annual revenue (\$127,611 combined).
- **Premium Tier:** High-ticket items like the **Greek XXL (\$35.95)** show lower volume but high margin potential.

03. DEEP-DIVE PRODUCT INSIGHTS

Size Dominance: The **Large** size pizza is overwhelmingly preferred, representing **88.8%** of all fulfillment (18,956 orders). This dictates nearly all packaging and logistics strategies.

CATEGORY VOLUME DISTRIBUTION (TOP 5)

Pizza Type	Quantity Sold	Share %
Classic Deluxe	2,453	4.95%
BBQ Chicken	2,432	4.91%
Hawaiian	2,422	4.89%
Pepperoni	2,418	4.88%
Thai Chicken	2,371	4.78%

04. CUSTOMER SEGMENTATION & LOYALTY

Customer behavior data reveals a high-frequency segment. The top 5 customers alone have accounted for nearly **10,700 orders** cumulatively, suggesting a mix of massive corporate accounts or extremely loyal brand advocates.

LOYALTY PROFILE: DEV MALHOT

With **2,217 lifetime orders**, this profile contributes significantly to steady-state revenue. Segmenting these high-value individuals for private reward tiers is a critical next step for retention.

- **Repeat Base:** Strong retention indicators with multiple customers exceeding the 2,000-order threshold.

05. OPERATIONAL & SEASONAL DYNAMICS

Peak Demand Identification: Hourly analysis flags two critical "Heatzones":

1. **Lunch Rush (12 PM - 1 PM):** Reaches 2,520 orders. Logistics must ensure maximum oven throughput during this 60-minute window.
2. **Dinner Peak (5 PM - 7 PM):** Sustained high volume (2,400 avg).

06. STRATEGIC RECOMMENDATIONS

I. WORKFORCE & OPERATIONS

- **Dynamic Staffing:** Implement a "Heat-Map" roster. Maximize staff availability on Fridays and during the 12 PM - 1 PM and 5 PM - 7 PM windows.
- **Production Throughput:** Prioritize "Large" size prep stations given the 89% market share to reduce wait times during peak spikes.

II. MENU & MARKETING STRATEGY

- **Upselling Premium SKUs:** Launch "Combo" deals pairing the high-volume 'Classic Deluxe' with high-revenue 'Thai Chicken' to increase average transaction margin.
- **Counter-Seasonal Campaigns:** Deploy localized discounts in October to mitigate the annual volume dip (bottoming at 1,646 orders)
